Online Photo Estimate Queue

Introduction	Shops that have the CCOPE feature code will have access to a new client feature deployment called "Enable Photo Estimate Centralized Queue". This client feature deployment allows Photo Estimates for multiple locations to be viewed in a centralized area. For additional information on Photo Estimate, click here.					
Permissions and Requirements	are routed to the new Photo ts view. er the client feature

-					
Photo Estimate					
	5 HNew Task Print				
Locations:		checked Out RO Number State	Customer	Vehicle	3
- All locations -	∼ 1 month ago		And Designation	2013 KIA OPTIMA	New
Photo Estimates	2 months ago	Opportunity	100.000	2010 LINC MKS	New
Received	2 months ago	Opportunity		2019 HOND Civic SI	S. In Progres

1	Allows users to see all locations which they have been granted access					
	as well as photo estimates that have come in for that location.					
2	Allows users to open the drop list:					
	Status		Description			
	Received		For new or in progress photo estimate			
	Sent (last 24 hours)		For completed photo estimates that were sent to the customer in the last 24 hours			
3	Displays statuses vary depending on the workfile:					
	Status	Status Description				
	New (never	Workfile has been received but has not been				
	opened)	saved. User can open, view, set priority, or delete.				
	New (opened)	Workfile has been received, opened, and saved.				
		This can no longer be deleted. You can view and set priority.				
	In Progress	One or more estimate lines have been added. User				
		has the ability to cancel or send the estimate to				
		the customer.				
4	Allows users to print the list of workfiles within the view.					
5	Allows users to add new tasks to any workfiles.
