

# Carwise® Photo Estimate Plugin

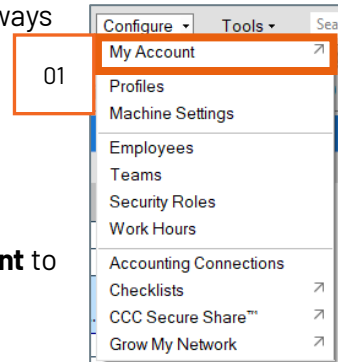

## Introduction

The Carwise® Photo Estimate Plugin allows you to provide a fast, online photo-based estimate app to your customers. You can access all available plugins through CCC® Repair Workflow or directly on cccone.com. This job aid describes how to access the Photo Estimate Plugin and choose from four different options for your shop website. Once you select your preferred option, we will show you how to generate the code to add the plugin to your website. For more information on how to use Photo Estimate, please see the [Photo Estimate Job Aid](#).

## Access Carwise Plugins

Before you begin, you will need to have your software serial number ready and the zip code for each location to generate the plugin code specific to that location. For example, if you have three different locations, you will have different software serial numbers and possibly, different zip codes for each.

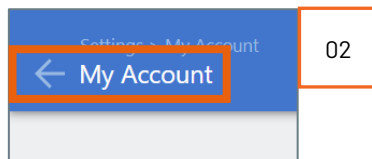

Once ready with that information, there are two ways to access the Carwise Photo Estimate Plugins. You can either go from the **Configure** menu on the desktop application or directly to cccone.com to access your Carwise Profile.

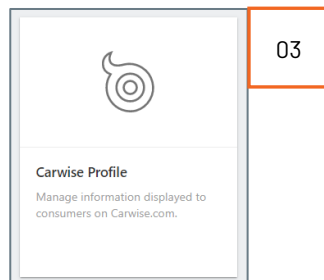

### From Repair Workflow

Go to the **Configure** menu, then select **My Account** to access cccone.com.

Next, select the left arrow on the upper left.

Select your Carwise Profile.

**Access  
Carwise  
Plugins,**  
continued

Your Carwise Profile page displays. Scroll down to the Online Photo Estimate with Carwise section.

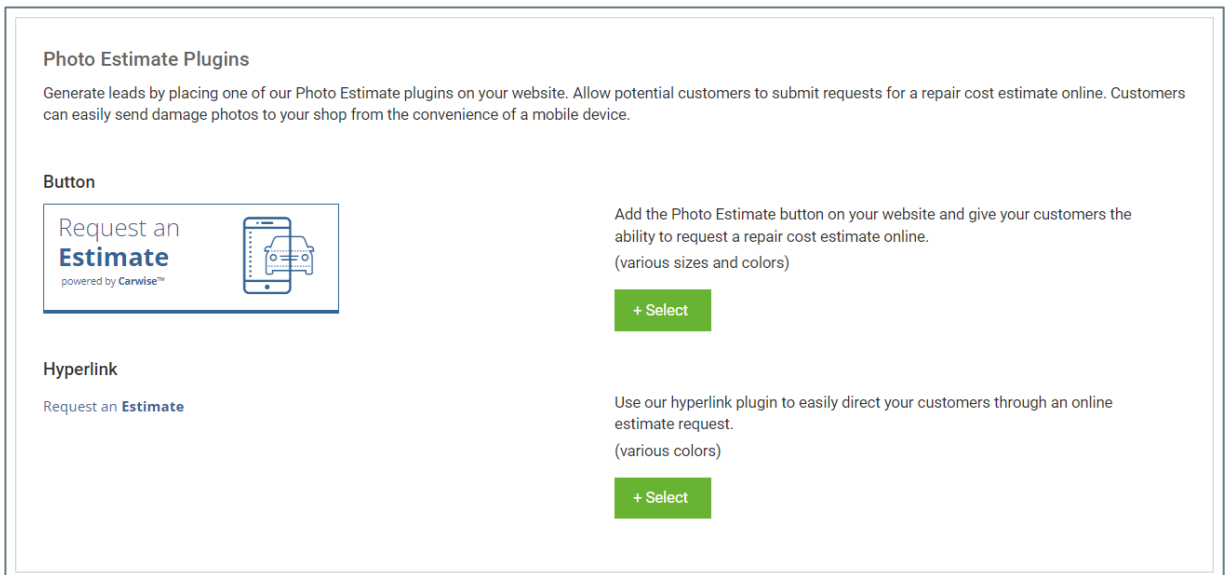

**Note:** Make sure to select the **Enabled** button if it is not already toggled on, then select **ACTIVATE** to continue.

Scroll down to the Enhance your website with Carwise plugins section and select **LEARN MORE**.

The Carwise Plugins page displays. Scroll down to the Photo Estimates section. You have several options for configuring your plugin.

## Configuring Your Plugin

On the Carwise Plugins page, the Photo Estimate Plugins show two different options: **Button** or **Hyperlink**. Decide which you want to add and select that **+Select** button to continue.

**Photo Estimate Plugins**

Generate leads by placing one of our Photo Estimate plugins on your website. Allow potential customers to submit requests for a repair cost estimate online. Customers can easily send damage photos to your shop from the convenience of a mobile device.

**Button**

Request an Estimate  
powered by Carwise™

Add the Photo Estimate button on your website and give your customers the ability to request a repair cost estimate online.  
(various sizes and colors)

**+ Select**

**Hyperlink**

Request an Estimate

Use our hyperlink plugin to easily direct your customers through an online estimate request.  
(various colors)

**+ Select**

Sign in to generate the plugin code. Enter the zip codes for the locations you want to generate and then select **Sign In**.

**Carwise™**

Home > Carwise™ Plugins > Plugin Selector

## Plugin Selector

The Carwise Plugin Selector allows you to customize and easily generate plugins for you to place on your auto body shop website. Simply find the plugin that you'd like to use and click **Generate Code**.

Note: You may need to contact your website administrator to place this code on your site.

Please sign in to view all plugins available for your shop:

**Sign In**

By clicking Sign In, you agree to the [Terms & Conditions](#) and that you have read and understood our [Privacy Policy](#).

## Configuring Your Plugin, continued

The Plugin Selector page displays already open to the **Photo Estimate** tab.

There are three different Button styles to choose from and one Embedded Widget option. Make your selections, then select the **Generate Code** button of the selected Button or Hyperlink.

The screenshot displays the configuration interface for the Carwise Photo Estimate plugin, divided into two main sections: **BUTTON** and **EMBEDDED WIDGET**.

**BUTTON SECTION:**

- Button 1:** Labeled "Request an ESTIMATE". It features a dark gray background with a white icon of a smartphone and a document. Below the button are three color swatches (dark gray, blue, red) and the text "Dark Gray (transparent) 160 x 40". A green "Generate Code" button is located below the swatches.
- Button 2:** Labeled "Request an Estimate". It has a white background with a blue border and a blue icon. Below the button are three color swatches (dark gray, blue, red) and the text "Dark Gray 220 x 43". A green "Generate Code" button is located below the swatches.
- Button 3:** Labeled "Request an Estimate powered by Carwise™". It has a white background with a blue border and a blue icon. Below the button are five color swatches (white, light blue, dark blue, red, black) and the text "Blue2 270 x 100". A green "Generate Code" button is located below the swatches.

**EMBEDDED WIDGET SECTION:**

- The widget is a form titled "Appointment Date/Time:" with a calendar view showing dates from Mon 10/23 to Fri 10/27. Below the calendar are input fields for "Year", "Make", and "Model".
- There is a section for "Insurance Company:" with an input field and a "(Optional)" label.
- A "Name:" section with input fields for "First Name" and "Last Name".
- A "Confirmation Method:" section with a dropdown menu and a "Phone Number" input field.
- At the bottom, there is a checkbox for "I agree to receive communication on the preferred contact method for this appointment. Text and data rates may apply." and a green "BOOK APPOINTMENT" button.

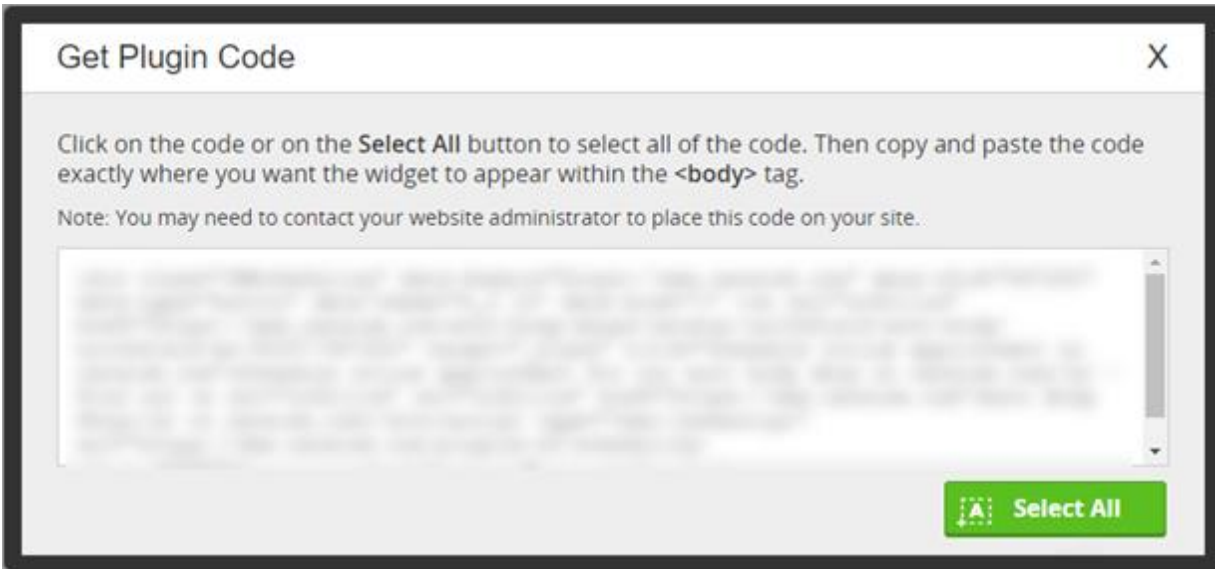

To the right of the embedded widget, there is a text box explaining: "Our Appointment plugin embedded in your website allows your customer to book an appointment directly from your website. This can be added either as a stand-alone page or put under your website's header & footer." Below this text is a green "Generate Code" button.

---

**Generate Code** Once you have selected either a Button or the Hyperlink and selected on Generate Code for that option, the Plugin Code automatically generates in a popup window.

Follow the directions on the window to select the code and highlight it all or select the green **Select All** button.

Right-click to copy the code. We recommend that you paste the code into a document to provide your website administrator. This person will then place the code on your site. Once completed, the button or widget will display.
