Carwise[®] Appointment Plugin

Introduction	The Carwise [®] Appointment Plugin allows your customers to book an appointment with you directly from your own website. These appointments will automatically display on your CCC [®] Repair Workflow calendar. You can access all available plugins through CCC [®] Repair Workflow or directly on cccone.com.						
	This job aid describes how to access the Appointment Plugin and choose from four different options for your shop website. Once you select your preferred option, we will show you how to generate the code to add the plugin to your website. For more information on Carwise Appointments, please see the <u>Carwise Online Scheduling Help Book</u> .						
Access Carwise Plugins	Before you begin, you will need to have your software serial number ready and the zip code for each location to generate the plugin code specific to that location. For example, if you have three different locations, you will have different software serial numbers and possibly, different zip codes for each. Note: If you need to verify the ssn or zip code , go to Configure , then My Account .						
	There are two ways to access the Carwise		CONE New - View -				
	Appointment Plugins. You can either go to the Calendar in the desktop application or directly to cccone.com.		Quick Start				
		~	My Work				
	From Repair Workflow	Q	Customer Experience				
	Go to the Calendar View . Click on the Click Here link	Ē	Production Schedule				
	in the yellow bar at the bottom of the Calendar.		Calendar				
	Calendar - Week View □ Service □ Service • Mark Applicationset + How Task 0 Service • Mark Applicationset + Mow Task 0 Service		Calcular (stante: 44 - UFCMING

Carwise[®] Appointment Plugin, Continued

Generate Code Once you have selected either a Button or the Embedded Widget and clicked on Generate Code for that option, the Plugin Code automatically generates in a popup window.

Follow the directions on the window to click on the code and highlight it all or click the green Select All button.

Right click to copy the code. We recommend that you paste the code into a document to provide your website administrator. This person will then place the code on your site. Once completed, the button or widget will display.
