

CCC® Estimating: How to use the Glass Database

Introduction

For NAGS® Glass Prices: CCC® Estimating includes, when available, both the vehicle manufacturer and the NAGS® benchmark prices as applicable to each make and model. All NAGS® part numbers and benchmark prices are provided from National Auto Glass Specifications, a division of Mitchell International, Inc. and display on the estimate line and in the MOTOR database. Labor operation times listed on the line with the NAGS® information are MOTOR suggested Labor operation times. NAGS® labor operation times are not included.

CCC® Estimating incorporates a specific Sublet Glass feature that can automatically calculate a company's County Based Discounts provided by Safelite® Auto Glass. If working on an insurance company estimate, this feature is only available if it's enabled on the Insurance Company Profile.

CCC® Estimating: How to use the Glass Database, Continued

Estimate Lines The County Based Discount will be applied using the **Repair Facility Zip Code**. If no Repair Facility Zip Code is provided the Insured's Zip Code will be used. If there is no Insured Zip Code, it will default to the **Claim Office Zip Code**. The Glass selection will appear as follows:

**	<input type="checkbox"/>	2 Subl	A/M	<u>Windshield plus kit</u>
*	<input type="checkbox"/>	3 Subl		<u>Windshield Labor</u>

Line 2 was calculated using County Type A discounts. The kit price is included in the total and noted on the line description and it is underlined to indicate a change was made to system generated OEM pricing. Taxes will be applied based on office profile setup.

Line 3 indicates a Flat Labor charge in the extended price column.

Both the labor and paint sections for line 2 and 3 are **locked** out. Labor and paint times CANNOT be added on these estimate lines by the claim rep.

Disclaimer

A specific disclaimer will be added to the estimate. This text will only be generated when a unit of Glass is selected with the **Sublet Glass Button**. The glass disclaimer that displays may be different depending on your or the insurance company's requirements.

The default glass disclaimer displays as follows within the general disclaimer:

separate procedure from the other panels in the estimate. Non-Original Equipment Manufacturer aftermarket parts are described as Non OEM, A/M or NAGS. Used parts are described as LKQ, RCY, or USED. Reconditioned parts are described as Recond. Recored parts are described as Recore. NAGS Part Numbers and Benchmark Prices are provided by National Auto Glass Specifications. Labor operation times listed on the line with the NAGS information are MOTOR suggested labor operation times. NAGS labor operation times are not included. Pound sign (#) items indicate manual entries.
