**Location Settings** Follow the steps below to configure Estimator Scheduling rules, Max Appointments Per Day/Week, and Non-drivable vehicle scheduling:

Step	Action
1	The <b>Estimator scheduling</b> function allows shops to route insurance assignments to specific estimators. If they have a preference, they can select a <b>Primary Estimator</b> from the drop-down, as well as a <b>Secondary Estimator</b> .  <b>Note:</b> If the shop does not have a preference on which estimator is assigned the insurance job, they can keep this preference set to <b>Any Available Estimator</b> .
2	The <b>Scheduling Rules</b> allow shops to determine how flexible they want the availability to be on their calendar. Max Appointments per Day/Week from the insurance company can be set using the sliders. The default is set to <b>No Limit</b> .
3	The <b>Non-drivable vehicle</b> settings allow shops to <b>Enable</b> or <b>Disable</b> Non-drivable vehicle scheduling. When Enabled, the insurance carrier may schedule appointments for non-drivable vehicles for this location.
4	Click <b>Save</b> , when finished editing the location settings.

The screenshot shows the configuration interface for Estimator Scheduling, Scheduling Rules, and Non-drivable vehicles. The interface is divided into three main sections:

- Estimator scheduling:** This section includes a dropdown for "Primary Estimator" (set to "Demo User2") and a dropdown for "Secondary Estimator" (set to "Chapel Smith"). A callout box labeled "1" points to the "Secondary Estimator" dropdown.
- Scheduling Rules:** This section includes two dropdowns for "Max Appointments Per Day" and "Max Appointments Per Week", both set to "No Limit". A callout box labeled "2" points to the "Max Appointments Per Day" dropdown.
- Non-drivable vehicles:** This section includes a toggle switch labeled "Enabled" which is turned on. A callout box labeled "3" points to the toggle switch.

At the bottom right of the interface, there are two buttons: "SAVE" and "CANCEL". A callout box labeled "4" points to the "SAVE" button.

### Insurance Appointment Configuration

Follow the steps below to return to the **Location Settings** page:

Step	Action
1	Select the <b>Location Name</b> .
2	Click <b>Edit</b> to return to the <b>Location Settings</b> for the selected location.

Having **Estimate appointments** configured for the shop allows customers and/or insurance carriers the ability to send them estimate appointments directly within CCC ONE. The appointment duration can be set from 15 minutes up to 2 hours depending on the shop's needs.

Having **Repair appointments** configured for the shop allows customers and/or insurance carriers the ability to send you repair appointments directly within CCC ONE. The appointment duration can be set from 15 minutes up to 2 hours depending on the shop's needs. In addition to the repair appointment duration setting, CCC also allows the shop to indicate when they will be able to accept their next repair appointment.

The **Earliest appointment available** setting allows the shop to adjust how soon the insurance company can send them new repair appointments. If the shop has limited capacity, they may consider increasing their earliest appointment available setting. Choosing **Today + X days** means the earliest the insurance company could assign the shop a new repair appointment would be X days from today. For example, if today was Monday and your setting for repair appointments is **Today + 2 days**, the earliest your shop would be able to receive a repair appointment would be Wednesday.

**Important:** Changing this setting back to Today once the shop has availability for new appointments will help ensure that the shop does not miss out on new work from that insurance company.
