

What's New – Estimate Review – February 2019

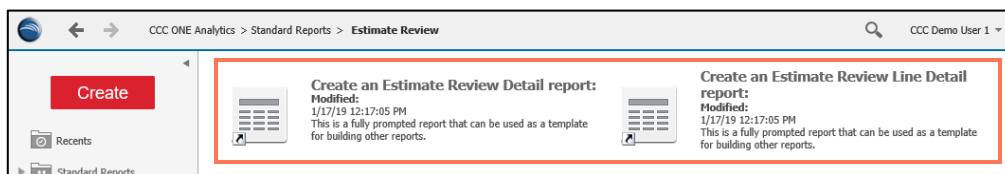

Introduction There are updates to the Estimate Review reports for February 2019. These updates include enhancements to values available in the Review Level and application enhancements.

Note: Estimate Review dashboards are not impacted by these new values.

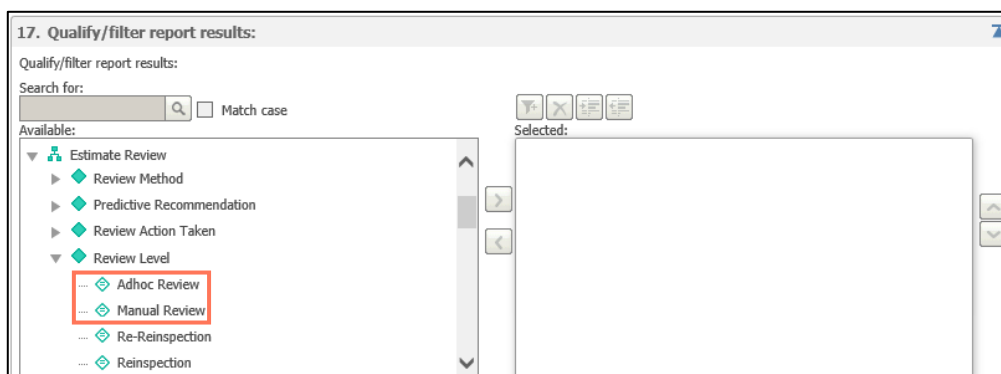

Estimate Review Enhancements

The **Estimate Review Summary Detail Report** and the **Estimate Review Line Detail Reports** have been expanded to include two (2) new values.

Part	Description
Estimate Review Summary	A detailed grid report that shows data at a review level. Each individual review is compiled and the values of the whole review for the attributes selected for each file is considered. This includes multiple reviews on a single estimate/supplement file.
Estimate Review Line	A detailed grid report that shows data for lines in a reinspection. Each line from every review is compiled and the values of each line on each file is considered from the attributes selected. This includes the lines included on multiple reviews on a single estimate/supplement file.

The new Review Level values are **Manual Review** and **Adhoc Review**.

Part	Description
Manual Review	A review on any file using custom reasons codes.
Adhoc Review	A review on the most recent claim estimating file (estimate or supplement) using custom reason codes.
