

| Option Code | Option Name | Option Definition |
|-------------|-----------------------|--|
| AG | Air Bag | Driver side air bag that is installed in the handlebars that inflates rapidly during select impacts. Look for SRS emblem on dash or handlebars. So far these are available only on Honda Goldwing motorcycles. |
| TD | Alarm | The vehicle must have an audible alarm. This is not a panic button. This does not include the Passive Anti-Theft System. This does not include the etched serial number in the glass of the vehicle. |
| AW | Aluminum/Alloy Wheels | Wheel rims made of aluminum/alloy. |
| AM | AM Radio | Audio equipment that receives AM signals. |
| A2 | Anti-Lock Brakes(2) | A braking system that alternates the pattern of braking between the two wheels. This allows more control of the vehicle during sudden stops. ABS might also be located on the console of the vehicle. |
| BE | Back Rest | A vertical support situated at the back of a motorcycle seat. Often includes a pad for additional comfort. Sometimes referred to as a "sissy bar" |
| K1 | Basic Chrome Kit | Traditionally this basic engine chrome kit includes rocker housing, rocker cover, tappet cover, outer primary, derby cover, cam cover, transmission top and side cover. |
| CA | Cassette | Audio equipment that plays cassette tapes. Look for tape player typically located in the dash. |
| CB | CB Radio | A 2-way radio that sends and receives radio signals. Typically integrated into the intercom headset system. |
| SK | CD Changer/Stacker | A multiple disc CD player that is usually located in the travel trunk or a saddle bag. Look for audio equipment with cartridge for CD's. Note: If there is only the Changer present, the Option for CD should not be selected. However, a CD Changer and a single disc CD player are not mutually exclusive, and both can be present on a vehicle. |
| CD | CD Player | Audio equipment that plays one compact disc. |
| CJ | Chrome Wheels | A premium wheel with chrome plating. Chrome can be highly reflective and has a mirror finish. |
| CC | Cruise Control | The vehicle must have an audible alarm. This is not a panic button. This does not include the Passive Anti-Theft System. This does not include the etched serial number in the glass of the vehicle. |
| XP | Custom Paint | Upgraded paint finish which could include airbrushed murals and graphics, custom colors or exotic effects. |
| CU | Custom Seating | Custom motorcycle seat which could include such features as more comfortable rider position, use of exotic covering materials, decorative stitching and upgraded padding. |
| CW | Custom Wheels | Aluminum/alloy spoke wheels which have a custom design profile for the spokes. Some examples would be flame spokes, blades, cyclone and crosses. |
| S2 | Dual Radio | A separate independent radio tuner/cassette/compact disc player. Controls are typically located in the passenger armrest of large touring bikes. |

| Option Code | Option Name | Option Definition |
|-------------|----------------------------|--|
| GE | Engine Guard | Tubing around the engine to protect vital engine parts in the event of the bike falling over. Also known as "Crash Bars" or "Frame Sliders", some models hide these protectors behind plastic covers. |
| EQ | Equalizer | Audio equipment that is used to boost certain frequencies. Equalizer will have controls for bass, treble, balance, and fade. |
| FF | Fairing | An enclosure on the front of the bike containing the windshield and affording wind protection to the rider. Can be attached to the frame and not move or be attached to the fork and move as the handlebars are turned. |
| FH | Floorboards/Highway Boards | Wide, comfortable footrests which is an upgrade to the typical foot pegs found on most motorcycles. |
| FM | FM Radio | Audio equipment that receives FM signals. |
| FW | Forward Controls | The foot pegs, foot brake, and shifter on a motorcycle can be located either pretty much straight down from the rider or positioned more to the front of the bike. In a forward position, the controls are referred to as Forward Controls. |
| K2 | Full Chrome Kit | Could include any number of additional chrome parts over and above those listed in the basic chrome kit. |
| HE | Headers | Exhaust piping from the exhaust manifold to the tip of the exhaust pipe, including the muffler. |
| H1 | Heated Seat | The interiors of the seat contain a heating element to warm the cushions. Look for switches on console, or seats. |
| IT | Intercom | A communication system that utilizes headsets so drivers and passengers can talk to each other. |
| JK | Jet Kit | A kit installed in a carburetor to increase the fuel flow. This kit typically includes adjustable jet needles, main jets, and slide springs. |
| LU | Light Bar | An aftermarket combination of additional headlights/taillights/fog lights mounted on either side of the factory headlight/taillights on a motorcycle. This can also refer to aftermarket marker lights or trim lights added to some motorcycles. |
| RR | Luggage Rack | A small rack typically located on the rear fender or on top of a travel trunk. Allows small items to be affixed to the rack for transport. |
| NV | Navigation | The On-board Navigation System utilizes voice messages and optical aids to guide you to pre-selected destinations. With the latest On-board Monitor and Compact Disc or DVD containing digital mapping technology and data, you select a destination from listed entries, or directly from mapped destinations on the screen. Note: This option should not be used for portable aftermarket devices. |
| PE | Performance Tires | A tire that provides increased grip in cornering situations. |
| PF | Plexiglass Fairing | Commonly referred to as windshield, it is a clear plastic panel attached to the handle bars of a motorcycle. |
| PQ | Powder coat | A finish process which utilizes a powder material that is electrostatic applied to a surface. The powder is then heated to the melting point and flows over the surface. |

| Option Code | Option Name | Option Definition |
|-------------|-------------------|---|
| MK | Rigid Saddle Bags | A tote or bag with a hard plastic, fiberglass or steel outer shell. Located on the sides above the rear wheel. |
| SE | Search/Seek | A feature on radio that allows user to sequentially scan for radio stations. |
| SQ | Side Car | A wheeled compartment attached to the side for carrying passengers or cargo. |
| MB | Soft Saddle Bags | A tote or bag with soft leather or vinyl outer covering. Located on the sides above the rear wheel. |
| ST | Stereo | Audio equipment that receives AM/FM signals and amplifies sound to speakers. Look for radio in dash of vehicle. |
| TY | Tank Bag | A storage bag that is attached to and sits atop the fuel tank. |
| T2 | Tank Bra | Leather or vinyl cover that protects the fuel tank from scratches, nicks and dings. |
| TK | Tool Kit | A small pouch which contains various tools which can be used for minor roadside repairs. |
| TV | Travel Trunk | A hard-sided storage compartment which is mounted behind the seat above the rear fender. |
| WI | Winch | A manual or power device employing a drum with cable used for pulling objects. |
