

CCC ONE® Valuation – Fee Calculator Services – Fee Input Preset Values for CCC® Estimating

Introduction

During the configuration process for Fee Calculator, companies that have contracted for Fee Calculator may define fee input preset values for applicable states. These input presets will be used by the system when calculating fees for valuation requests.

Submissions via CCC® Estimating should not be used when changes to the presets are necessary for a given claim, as the user may not have the ability to select, or adjust, these inputs within the CCC® Estimating interface. Rather, submissions should be made via the CCC® Portal.

Throughout the Fee Calculator process, please reference the [Fee Calculator Reference Guide](#) for additional information.

Note: Fee Calculator is only available for companies that have the necessary contract with CCC.
