Measure	Definition	Formula	Category
Cnt	total valuation cnt.  (Folder path in CCC ONE Metrics\Valuation\Productivity).	where Body Category = Car) / (Valuation Cnt where Type <> Unknown)	ductivity
Car or Truck Valuation Cnt	The count of valuations where the body category is Car or Truck.  (Folder path in CCC ONE Metrics\Valuation\Productivity).	Valuation Cnt where Body Category = Car or Truck	Metrics - Productivity
Car Valuation Cnt	Total count of valuations where the body category is Car.  (Folder path in CCC ONE Metrics\Valuation\Productivity).	Valuation Cnt where Body Category = Car	Metrics - Productivity
CES Dupe VIN Cnt	The total count of VINs for which CCC had previously received a Collision Estimate file.  (Folder path in CCC ONE Metrics\Valuation\Other).		Metrics - Other
CES Dupe VIN File Cnt	The number of valuations that contained a VIN for which CCC had previously received a Collision Estimate file.  (Folder path in CCC ONE Metrics\Valuation\Other).		Metrics - Other
Claim Category	Claim Category is a grouping of the Types of valuations completed.		Attributes - Claim

## Valuation Glossary of Terms

Measure	Definition	Formula	Category
	<p>Example: when the Claim Type is Vehicle or Motorcycle, the Claim Category will be Vehicle. Values include: • Vehicle • Structural • Other • Unknown</p> <p>(Folder path in CCC ONE Attributes\Claim Type).</p>		Type
Claim Number	<p>Claim number for the loss vehicle.</p> <p>(Folder path in CCC ONE Attributes\Valuation Detail).</p>		Attributes - Valuation Detail
Claim Type	<p>Claim Type is an attribute that reflects the type of valuation completed. Examples include: • Bus • Emergency • Heavy Equipment • Heavy Truck • Motorcycle • Other • Recreational Vehicles and Campers • Sport/Off Road • Structural • Trailer • Unknown • Vehicle • Watercraft</p> <p>(Folder path in CCC ONE Attributes\Claim Type).</p>		Attributes - Claim Type
Claim Type Detail	<p>Claim Type Detail provides more specific information on the types of valuations completed. Examples include: • Car, • Pickup, • Utility Vehicle, • Van, • Cargo / Utility Trailer, • Motorcycle, • Scooter / Moped, etc.</p> <p>(Folder path in CCC ONE Attributes\Claim Type).</p>		Attributes - Claim Type
Collision % of Valuation Cnt	<p>The count of valuations where the loss category is Collision as a percent of the total valuation cnt.</p> <p>(Folder path in CCC ONE Metrics\Valuation\Productivity).</p>	$\text{(Valuation Cnt where Loss Category= Collision) /}$	Metrics - Productivity

## Valuation Glossary of Terms

CCC® Analytics

Measure	Definition	Formula	Category
		(Valuation where Loss Category = Collision, Comprehensive or Liability)	
Collision Final Valuation Amt	The Final Valuation Amount where the loss category is Collision. (Folder path in CCC ONE Metrics\Valuation\Severity).	Final Valuation Amt where Loss Category = Collision	Metrics - Severity
Collision Final Valuation Amt Avg	The average Final Valuation Amount where the loss category is Collision. (Folder path in CCC ONE Metrics\Valuation\Severity).	(Final Valuation Amt / Valuation Cnt) where Loss Category = Collision	Metrics - Severity
Collision or Theft Valuation Cnt	The count of valuations where the loss type is Collision or Theft. (Folder path in CCC ONE Metrics\Valuation\Productivity).	Valuation Cnt where Loss Type = Collision or Theft	Metrics - Productivity
Collision Valuation Cnt	The count of valuations where the loss category is Collision. (Folder path in CCC ONE Metrics\Valuation\Productivity).	Valuation Cnt where Loss Category = Collision	Metrics - Productivity

## Valuation Glossary of Terms

CCC® Analytics

Measure	Definition	Formula	Category
Company	<p>This folder corresponds to the insuring company for whom estimates and supplements and total loss valuations were generated. The prompt window within Intellisphere displays the hierarchy of the company as set up and maintained in CCC's Front Office System. This hierarchy includes all locations to which data is tied, as well as all locations at levels above the lowest level locations. Once a report is generated, the user can drill down to lower levels within the Company hierarchy.</p> <p>(Folder path in CCC ONE Attributes\Company).</p>		Attributes - Company
Comprehensive % of Valuation Cnt	<p>The count of valuations where the loss category is Comprehensive as a percent of the total valuation cnt.</p> <p>(Folder path in CCC ONE Metrics\Valuation\Productivity).</p>	$\frac{\text{(Valuation where Loss Category = Comprehensive)}}{\text{(Valuation where Loss Category = Collision, Comprehensive or Liability)}}$	Metrics - Productivity
Comprehensive Final Valuation Amt	<p>The Final Valuation Amount where the loss category is Comprehensive.</p> <p>(Folder path in CCC ONE Metrics\Valuation\Severity).</p>	$\text{Final Valuation Amt where Loss Category = Comprehensive}$	Metrics - Severity

## Valuation Glossary of Terms

Measure	Definition	Formula	Category
Comprehensive Final Valuation Amt Avg	The average Final Valuation Amount where the loss category is Comprehensive.  (Folder path in CCC ONE Metrics\Valuation\Severity).	(Final Valuation Amt / Valuation Cnt) where Loss Category = Comprehensive	Metrics - Severity
Comprehensive Valuation Cnt	The count of valuations where the loss category is Comprehensive.  (Folder path in CCC ONE Metrics\Valuation\Productivity).	Valuation Cnt where Loss Category = Comprehensive	Metrics - Productivity
Condition Adj Amt	Dollar adjustment for condition of vehicle.  (Folder path in CCC ONE Metrics\Valuation\Vehicle Condition).		Metrics - Vehicle Condition
Condition Format Used	CCC supports several different Condition Rating Formats for valuations that •Define for a company how condition ratings can be input when entering a valuation request; •Define condition baseline for valuing a vehicle; •Define how condition adjustments display on the valuation response.  There are five different condition formats supported by CCC:E1, E2, N1, N2, and BV.A sixth code, "XX", is used only when the format submitted does not match the valid codes listed.  (Folder path in CCC ONE Attributes\Condition\Valuation Condition).		Attributes - Valuation Condition
